PROFESSIONAL SUMMARY

Final-year Bachelor of Science student in Artificial Intelligence and Machine Learning with core technical training in Python, SQL, Microsoft Excel, Power BI, and Machine Learning. Experienced in data analysis, data cleaning, exploratory data analysis (EDA), statistical analysis, data visualization, and interactive dashboard development. Demonstrated technical capability through machine learning projects, national hackathons, and international research presentations. Seeking an entry-level Data Analyst position to translate complex datasets into actionable business insights and support data-driven decision-making processes.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R

Data Analysis: Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Validation, Data Visualization

Libraries: Pandas, NumPy, Scikit-learn

Business Intelligence: Microsoft Power BI, Microsoft Excel (Pivot Tables, Lookup Functions, Charts)

Databases: SQLite, SQLAlchemy

Tools: Git, Jupyter Notebook, Docker (Basic), FastAPI, HTTPX

PROJECTS

ADA Framework (Active Deception Architecture)
GitHub: github.com/Dharma-prakash2006/ADA

- Developed a Python-based telemetry analytics framework to capture and analyze user interaction log data for identifying anomalous behavioral patterns.
- Engineered an asynchronous data processing pipeline using FastAPI and HTTPX to handle real-time request collection, session routing, and data transformation.
- Implemented the Isolation Forest machine learning algorithm using Scikit-learn to detect anomalous user activities through behavioral analytics.
- Integrated Google's Gemini 2.5 Flash model via API function calling to interpret natural language log data and trigger automated mitigation workflows.
- Containerized system components using Docker and Docker Compose to maintain execution consistency and environment stability across deployments.

Technologies Used: Python, SQL, Scikit-learn, FastAPI, Docker, HTTPX, Gemini AI

CERTIFICATIONS

- **IBM Data Fundamentals** | IBM SkillsBuild | Jul 2026
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate**
- **Oracle Cloud Infrastructure 2025 Certified Foundations Associate**

EDUCATION

Bachelor of Science in Artificial Intelligence and Machine Learning **2024 – 2027**
Akshaya College of Arts and Science, Kinathukadavu, Tamil Nadu, India *Expected Graduation: 2027*

RESEARCH & PUBLICATIONS

Tritium: A Ternary AI Architecture for Scalable and Energy-Efficient Machine Learning **Oct 2025**

Presented at International Sustainability Conference *Scholarly Research Lead*

- Evaluated alternative AI computing paradigms to improve quantitative performance metrics and reduce energy consumption during model training.
- Analyzed computational bottlenecks and memory overhead across deep learning workloads to optimize hardware resource utilization.

Adaptive Deception Agent (ADA) **Sep 2025**

Presented at ICRTMRI'25 International Conference *Scholarly Research Lead*

- Developed a multi-agent cybersecurity framework for real-time threat detection, automated attacker redirection, and telemetry analysis.

HACKATHONS

ISRO Bharatiya Antariksh Hackathon 2025 **Aug 2025**

- Collaborated in a multidisciplinary team to design space technology software and data architecture under strict compliance timelines.

Google Cloud Agentic AI Day 2025 **2025**

- Engineered AI-powered multi-agent automation workflows and contributed to system architecture design and data flow modeling.
